2015-08 MANAGED PRINT SERVICES

News Feature

## Managed Print Services

Are you tired of running to the store for toner?

Does it usually run out in the middle of a big project or proposal?

Would you like to have a better handle on your printing costs?

If you answered 'yes' to any of these questions, Managed Print Services (MPS) might be for your business. If you sign up for MPS, Aslan Computer Systems will monitor your printer and have necessary supplies, excluding paper, at your business when they are about to run out.

With MPS, after you buy your eligible printer, you pay a flat monthly rate plus a small per-page charge to cover the toner and supplies you use. You pay on a monthly basis and only for the number of pages you actually print. You do have to provide your own paper.

Some MPS providers require you to commit to a long term contract to be able to take advantage of Managed Print Services, but not Aslan Computer Systems. You can cancel any time by providing notice of your intention. This gives us incentive to give you great service. We do hope you will stay with us for a long time, but we believe you should have the option to cancel if you choose.

Aslan Computer Systems has been providing world class support to our customers for more than 20 years, so it makes sense that we would partner with a MPS expert to provide this service. Lexmark has been providing MPS services since the late 1990's.

Contact us at [sales@aslan.ca](mailto:sales@aslan.ca) to request a customized managed print services assessment for your business.

Whether you want managed print services or not, Aslan Computer Systems is pleased to offer this printer at a significant discount through August.

And toner is discounted even more, but if you are a managed print services customer you won't care, because toner is covered by your agreement.

These savings are only available until the end of August, so be sure to contact [sales@aslan.ca](mailto:sales@aslan.ca) **now** to take advantage of these great discounts.

## Tips and Tricks

**Configure privacy settings in Windows 10** – Extreme Tech advises that “When you’re first setting up Windows 10, make sure to select a Custom install so you can modify the privacy settings.” They go on to point out that you don’t have to share private information to get Windows 10 and that though the upgrade is free for qualifying customers, Windows 10 is not a free product.

## Security Trends

**Your phone may not be your own** – Think your device is safe from scrutiny? If there might be corporate data on it, your employer may have a right, or even an obligation, to access it.

## New Technology

**Gadget Gives More Room on Airplane**– Airhook upgrades your economy plane ticket without moving you. Stow your electronic device, your coat, and your coffee without opening the airline tray, giving you more room.

**Internet of Things Update**– Branto lets you keep a 360-degree eye on your home. It is good that they have “security features”, but I’d be happier with a firewall to ensure secure communications.

## Q & A

Question: What is BYOD?

Short Answer: BYOD (bring your own device) is the increasing trend toward employee-owned devices within a business. Smartphones are the most common example but employees also take their own tablets, laptops and USB drives into the workplace. BYOD also brings security risks...

From [What is BYOD \(bring your own device\)?](#) – Definition from WhatIs.com

This month, we have a question for you: **How do you use social media?**
